

# January 2011 Newsletter

Dear Friends,

I hope this finds everyone in good health and excited about the New Year. We, at Don Jason Remodeling, are all well and, thankfully, very busy. Nearly all of our business, these past few years has come from you. You've either had us come back for another project or you've told someone about your experience with us. We have been so blessed to work for such nice people. I want to truly thank all of you who have given us the opportunity to serve and do what we love.

We are currently working on a beautiful large remodeling project for wonderful clients. This makes a nice start for the New Year and we are so grateful for the work.

As I talk with more and more people about remodeling projects I have become aware of the detailed nature of each clients desires. No longer are clients happy with standard ideas and cookie cutter projects. They want their home to fit their needs and lifestyles. We provide that detailed attention that today's clients deserve.

We caution homeowners to really be thoughtful and creative in their process of designing and building the remodeling project of their dreams. We can help people sort through their ideas and show them many ways to reach the same results. With our three dimensional computer presentation program each home owner can see their completed project with various design options. With the help of these visual representations homeowners can have a clearer understanding of what they are really going to get. They can look at a good, better and best scenario and determine which design and price point truly meets their desires. Homeowners can add the little details which truly make their design unique to their lifestyle.

As clients view the different ideas they realize that some of their ideas work and others don't. This helps them rethink their priorities and discover the plan of their dreams before any of the construction work is started. This leads to the best use of the investment dollars and future happiness with the completed project.

If you or your friends would like to discuss future remodeling needs please contact us. We will work diligently to properly serve all your remodeling needs.

I would like to send future correspondence by email to any who would prefer. This will save paper and mailing costs. If you feel comfortable with this process please email me at [jasonb6@windstream.net](mailto:jasonb6@windstream.net). For the next newsletter I will discuss ideas about green building. What does this really mean and how can it work for you. If you have any subjects you would like me to discuss in future letters just email me or give me a call. Again, thanks for all your support and friendship.

Have a great winter season.

Sincerely

Don Jason
